

CPSC 3720

Lesson 23

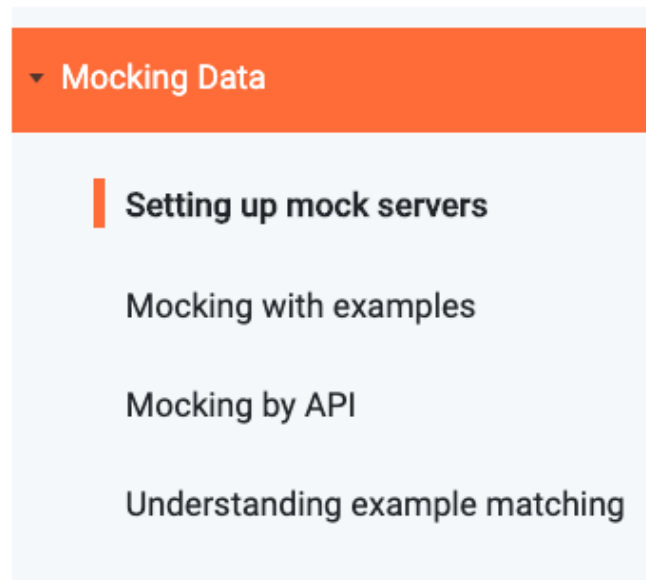

Connie Taylor
Professor of Practice

School of
COMPUTING

Updates

- Creating API learning and Fake it till you Make it –will take updates through end of day today
 - I HIGHLY advise you all to go through this tutorial about the OpenAPI Spec: <https://app.swaggerhub.com/help/tutorials/openapi-3-tutorial>
 - And this section of the Postman Learning Center documentation:

- Exam 1 due 11pm Monday - available now. Same format as quizzes but covering more and allowing 50 min vs 15 min.

CUSports – Sprint 1 Update

- Each team needs to have one API that supports the use cases for this sprint
- Each team should identify the API in class Monday
- The teams should be updating Trello with their Stories and tasks.
- All deliverables are the same, but only for 1 API per team.

Sprint “Definition of Done”

- User Stories and Tasks in Trello
- User Story tracking in Trello throughout sprint
- API Definition/schema in Postman
- API Documentation in Postman
- API Mocks and examples in Postman
- Retrospective in Trello
